SUBJECT INDEX

Actinides
Complex formation of the lanthanides and actinides in lower oxidation states 1

Biological systems
Coordination chemistry of vanadium in biological systems 61

Chromium(VI) species
Spectroscopy of chromium(VI) species 223
Copper(II) halides
Multiple stereochemistry in copper(II) halides 181

Electron transfer reactions
Stereoselectivity in electron transfer reactions involving metal ion complexes 125

Isoxazoles
The coordination chemistry of isoxazoles 251

Lanthanides
Complex formation of the lanthanides and actinides in lower oxidation states 1

Metal centre
Coordination equilibria and coupling reactions at a metal centre 207
Metal coordination complexes
Solid-state nuclear magnetic resonance spectroscopy of metal coordination complexes and organometallics 107
Metal ion complexes
Stereoselectivity in electron transfer reactions involving metal ion complexes 125

Organometallics
Solid-state nuclear magnetic resonance spectroscopy of metal coordination complexes and organometallics 107

Unsaturated hydrocarbons
Coordination equilibria and coupling reactions of unsaturated hydrocarbons at a metal centre 207

Vanadium
Coordination chemistry of vanadium in biological systems 61
